EXPERIENCE

Amazon

March 2018 - Present

Senior Python Developer

Pioneered the development of a distributed web scraping framework using Scrapy and Python, delivering critical market insights and influencing product pricing strategy.

Supervised and mentored a team of 5 developers, driving an initiative that reduced code redundancy by 25% through the introduction of modular programming techniques.

Orchestrated a major cloud migration of Python-based applications to AWS, reducing infrastructure costs by 20% while achieving 99.99% uptime.

Collaborated with the machine learning team to integrate AI capabilities into existing Python applications, resulting in a 10% improvement in recommendation accuracy.

Revolutionized the company's deployment strategy by implementing Blue-Green deployment using Python scripts, cutting downtime during deployments by 95%.

Coached.com

February 2015 - February 2018

Python Developer

Designed and maintained a RESTful API that handled over 1 million requests per month, employing Python and Flask to ensure scalability and performance.

Optimized SQL database interactions using SQLAlchemy ORM, which led to a 30% improvement in transaction times for high-traffic applications.

Slack

August 2012 - January 2015

Software Engineer, Backend Development

Developed and maintained backend services in Python that supported real-time messaging and collaboration features for millions of users.

Automated deployment processes using fabric scripts, saving 12 hours of manual deployment labor per week.

EDUCATION

Resume Worded Institute

May 2017

Master of Science in Computer Science

Focus on Distributed Systems

Resume Worded University

March 2014

Certified Information Systems Security Professional (CISSP)

Part-time

SKILLS

Programming Languages: Python (Pandas, NumPy, Flask), Java, C++, SQL, JavaScript, HTML/CSS
Frameworks & Libraries: Django, React, Node.js, TensorFlow, PyTorch, Bootstrap
DevOps Tools: Docker, Kubernetes, Jenkins, Ansible, Terraform, AWS CloudFormation
Databases: MySQL, PostgreSQL, MongoDB, Redis, Elasticsearch

OTHER

Certifications: AWS Certified Solutions Architect – Associate (2020), Google Cloud Certified – Professional Cloud Architect (2021)

Projects: Developed a multi-threaded social media data mining tool, Presented at PyCon 2020 on 'Efficient Microservices'

Publications: Co-authored 'Python in High Performance Computing', Published in 'Journal of Pythonic Research'

Continuous Learning: Regular attendee of Python workshops, Completed 'Advanced Machine Learning with TensorFlow on GCP' course on Coursera
